

Customer Churn - Analytics Report

Generated: 2026-07-24 01:07

Executive Summary

Out of 7,043 customers, 1,869 have churned (26.5% churn rate), representing an estimated \$139,130.85/month (\$1,669,570.20/year) in revenue at risk.

Highest-Risk Contract Types

Contract Type	Churn Rate
Month-to-month	42.7%
One year	11.3%
Two year	2.8%

Major Churn Drivers

Feature	Importance
has_internet	1.1673
tenure	1.1011
InternetService	0.8635
Contract	0.6242
num_services	0.5345

Retention Recommendations

- Prioritize retention outreach for month-to-month contract customers - offer incentives to upgrade to annual plans.
- Review pricing/experience for customers paying via electronic check, which typically shows elevated churn.
- Bundle tech support / online security add-ons for fiber-optic customers, since low service engagement correlates with higher churn.
- Set up an early-warning trigger for customers in their first 12 months of tenure, the highest-risk window.
- Use the churn prediction tool to proactively flag high-risk accounts for the retention team before they cancel.
